### Microsoft Office Plus Deluxe Complete Training Bundle

Visit our website to Download a PDF Breakdown

When you need to focus your training initiative on Desktop application training such as Microsoft Office 97, 2000, 2002/XP, and 2003, for the entire office. This training library is the perfect solution. To help cover the needs of everyone in the office, this office training library includes Multi-User license for the entire Office XP Suite such as Word, Excel, PowerPoint, Access, Outlook, and Windows XP. Also single user licenses for over 150 titles to educate and empower today's office professionals.

This library provides interactive training on all of the essential functions in Word, Excel, Outlook, and PowerPoint. Fundamental, intermediate, and advanced level courses provide incremental and focused training on all of the most critical skills required to achieve stellar job performance. To make sure all of your learning needs are met, we have also added bonus Multi-User License for over 11 titles related to graphic and webs design such as Adobe and Macromedia.

## Online Libraries

### Web-Based Training

#### Office Plus Library

The Office Plus Library contains over 150 titles to educate and empower today's office professionals. The Office Plus Library is comprised of courses in all of the popular desktop applications, including word processing, presentations, spreadsheets and database applications. For those desiring to take their office skills to the next level, there are also courses on Web design and development. In addition, courses for the popular sales contact management applications are included. Courses providing an in-depth look at the Windows XP, 2000 and 98 operating systems round out the library.

#### Technology Plus Library

In today's Information Technology World, certification and training go hand in hand. The Technology Plus Library can help with the challenge of quickly getting you up to speed on important IT topics and technologies. The titles contained in this library offer certification training for Cisco's CCNA, Microsoft's MCSE, MCDBA, and Sun's Certified Java Programmer certificates. In addition, courses in key areas of programming, web development and operating system training are included in this library.

#### Safety and OSHA Library

This Complete Safety & OSHA Library contains 70 robust titles on subject matter such as construction, food service, general safety, industrial, health care and much more. Individual titles are available in core libraries as part of an extensive industrial safety training series.

#### HIPAA Library

All the HIPAA tutorials are designed to address the needs of busy professionals. Tutorials include assessment testing, quizzes, optional audio, exercises, self-paced tutorials, and real-world examples and scenarios. Learners interact with rich, multimedia tutorials in real-time with minimum impact on system and network resources.

#### Sales Development Library

The Sales Development Library provides an invaluable tool to building a top-producing sales staff. Sales professionals will learn how to establish and approach prospects with confidence, make the most of partner selling, conduct needs reviews, negotiate agreements, and translate value, and more.

The **Defensive Driving** course for personal computers is based on the same content used in the National Safety Council's eight-hour, instructor-led Defensive Driving course, the most widely used driver safety program in the world. More than 45 million drivers have learned to protect themselves on the road by taking part in the National Safety Council programs.

#### Flammable and Combustible Liquids Library

The potential for fire and explosion resulting from the use of flammable and combustible liquids is serious, and OSHA's Flammable and Combustible Liquids standard is meant to help minimize these risks. This course reviews some of the key provisions of this standard: flash point, classes of flammable and combustible liquids, and the concept of bonding and grounding. The course also offers guidelines for safe storage and handling techniques.

#### Business Professional Library

The Business Professional Library targets corporations and government entities that want to increase productivity and decrease liability. This integrated collection of professional development e-Learning courses meets a critical business need as companies are charged with training their employees on communication skills, professional development and employee conduct.

The Professional Advantage Series courses were co-authored by experts who are recognized authors or renowned seminar speakers and business behavior consultants. Online learners are exposed to the same content that they would obtain if they had read an entire book or attended a lengthy seminar.

The Professional Development Library contains almost 70 titles to educate and empower today's workforce professional at different levels in your organization. The Professional Development Library is comprised of courses that span across many business behavior skills, including managing time, managing people, managing projects, selling, creating Presentations and Human Resource products.

#### Custom Content Development

When an off-the-shelf solution isn't the answer, by utilizing a team of experienced instructional designers and Web developers can offer expertise in the areas of program design, application authoring, multimedia technologies, internet development and computer systems integration.

In every case, we create a compelling e-learning experience that ensures your users receive the information they need to succeed. All custom content is developed to the AICC and SCORM standards, so that it "plays nicely" in other Learning Management systems.

## \$400 Training Scholarship

As an introduction to our training courses, we're offering you a \$400 training scholarship that can be applied to any of our training.

**Fill-out a scholarship application** and accept your scholarship today.  
Become Certified!
